EXPERIENCE

Full Stack Developer Intern: TechSimPlus (Bhopal)

July 2024 – December 2024

A technology-driven company and learning platform focused on developing web applications and digital solutions.

- Created a dynamic and responsive Navbar, Sidebar, and Footer using React.js and Tailwind CSS, ensuring seamless navigation across devices.
- Designed and implemented an interactive Landing Page and Login/Signup page with an engaging UI and smooth animations.
- Built a fully responsive Admin Dashboard, integrating real-time data visualization and user/test management features.
- Optimized UI components for performance and accessibility, ensuring a smooth user experience across different screen sizes
- Collaborated with the team to improve frontend architecture and implement best coding practices.

Web Developer Intern : Levelup Technologies(Remote)

June 2024 – September 2024

- Worked alongside a team of 3 developers to build the Admin Panel for a Learning Management System (LMS) at Level Up Technologies.
- Created and implemented a fully responsive Admin Panel used by over 1,000 active users, ensuring compatibility across multiple devices and screen sizes.
- Developed a responsive sidebar and integrated it into a dashboard with 10+ interactive sub-components, improving user navigation and experience.
- Contributed to reducing development time by 20% using efficient coding practices and component reuse
- Participated in weekly sprint planning and code reviews to ensure quality and maintainability of the project, contributing to the project's long-term scalability.

PROJECTS

Job-Scan | [Link](#)

- Engineered a job search platform enabling students to sign up, explore opportunities, and apply, while recruiters can publish and oversee job listings.
- Crafted a dynamic, fully responsive user interface using React.js and Tailwind CSS to ensure a seamless experience across various screen sizes.
- Devised an advanced job filtering feature, enabling users to refine searches and apply based on multiple criteria.
- Constructed a recruiter panel for effortless job post management, applicant tracking, and job status updates.

Debug-Diaries | [Link](#)

- Engineered a blogging platform that enables developers to share debugging experiences, solutions, and technical insights.
- Crafted a sleek and responsive UI using Next.js and Tailwind CSS, ensuring optimal readability across all devices.
- Integrated a TinyMCE editor, enabling users to effortlessly write and format blog content.
- Optimized application performance with Appwrite, enabling efficient storage and retrieval of blog posts.
